Nandina domestica

Nandina domestica

Common name: Heavenly bamboo.

Height: 1.5-2M

Soil: well drained soil. Full sun.

Flowering: Flowers stems with small yellowish white flowers, followed by red berries.

Hardiness: [hardiness rating 1/2.](#)

Nandina domestica is an evergreen shrub, commonly confused as a bamboo. The heavenly bamboo has an extremely eye-catching foliage, from green-reddish in summer to fiery red in autumn.

Native to China and Japan.
