Stewartia pseudocamellia "Koreana"

Stewartia pseudocamellia "Koreana"

Common name: Korean Stewartia

Height: 8-10M

Soil: well drained soil. Half shade to full shade.

Flowering: Solitary camellia-like white flowers with yellow-orange stamens.

Hardiness: [hardiness rating 1.](#)

Stewartia pseudocamellia Koreana is a deciduous tree. The Korean Stewartia is hardier than the Japanese Stewartia. The leaves of Stewartia pseudocamellia Koreana also tend to be larger. Green leaves, which turn fiery red in autumn. The Korean stewartia has an exfoliating gray, creamy yellow to orange bark in summer.

Native to Korea.
