Marcopolo Plants

Camellia japonica

Camellia japonica

Common name: Common Camellia, Japanese Camellia, Thea japonica

Height: 1-3M

Soil: moist soil, but well drained. Full sun to half shade.

Flowering: varying from bright purple to pinkish white roselike flowers

Hardiness: [hardiness rating 1/2.](#)

Camellia japonica is a evergreen shrub blooming from late winter to mid spring. Next to its eye-cathing flowers, the strong leathery shiny evergreen leaves of the Japanese Camellia make this plant goodlooking all year round.

Camellia japonica is native to Japan and Korea.
