Marcopolo Plants

Fatsia japonica

Fatsia japonica

Common name: Japanese fatsia, figleaf palm, Japanese aralia, Japanese Rice-Paper Plant

Height: 2-3M

Soil: well drained soil. Full shade to half shade.

Flowering: small creamy white clustered flowers on flower stems.

Hardiness: [hardiness rating 2/3](#).

Fatsia japonica or Japanese Fatsia, is a relatively hardy tropical-looking evergreen shrub. Its splendid glossy, green palmate, deeply lobed leaves make it extremely popular in tropical gardens. Fatsia japonica produces creamy white flowers in large panicles, often followed by round, black fruits. Japanese Fatsia needs protection against drying winter winds.

Native to China and Japan.
